DATE: January 27, 2023

SUBJECT: Loud Noise Notice

The Surgical Construction Renovation continues to move forward with the demolition of 3A north wing nearing completion. During the project, staff, physicians and patients can expect to hear “*loud noise*” work occurring such as drilling, chipping and banging.

In an effort to minimize the impact this may have on everyone collaboratively, the construction team has identified designated loud noise times.

Moving forward loud noise times can be expected between the hours of 0700-0900 and 1500-1730 daily.

During this time frame, the contractor will perform loud work and it may impact specific areas of the building or it may be heard throughout the building.

Loud noise does not include loud sounds localized to the immediate areas adjacent to the construction zone that may occur as part of necessary construction work in the contractor’s day to day activities.

If the noise outside of the loud noise hours is impacting Hospital operations, please contact Maintenance at ext 8050.

Thank you for your understanding and cooperation as we work through this project.
