With the co-circulation of respiratory diseases this fall such as influenza, COVID and RSV, vaccinations will be very important to protect the health of individuals, families and communities, while also reducing the impacts on our healthcare system.

Staff, Physician and Volunteer Vaccination Program:

Starting the week of October 21st, 2024, the Occupational Health and Safety Team will be running concurrent vaccination clinics, offering both the seasonal influenza vaccine as well as the COVID-19 vaccine. The clinics will be **drop-in** where staff, physicians, and volunteers can request to receive either vaccine or both vaccines.
