Preventative Maintenance

Q-Tip #23

- Preventative maintenance ensures that medical devices and equipment work and are safe to use
- At PRH, biomedical engineering services including safety inspections for new equipment, preventative maintenance, repairs and recalls are provided by Jacob Dickerson (except for Lab & Diagnostic Imaging)
- If you find a medical device or piece of medical equipment is not functioning properly:
 - **Remove** it from circulation
 - **Submit** a work order through *Megamation*
 - **Label** it with an "Maintenance Work Order" repair tag
 - **Contact** Biomedical Engineering for *critically urgent* medical device repair requests and recalls.
